Assignment1

Project Proposal

Barber shop booking Website

Name:Xinyu Ji

Student ID: 220460399

Product Summary

I'm going to create a barbershop appointment website. On this booking website users can appointment time to decide their schedule. Users will fill in some personal information and their email, and choose a barber who they want, when user has filled this out, they will see the fee and time spent. This is to help the customers can make a appointment at any time, and save some time.

Product Purpose

The purpose of this website is hope the users can through this online booking system to complete the online reservation, no matter when and where.

--Target audience

The key target audience are the people who want a haircut, through this website, they will need not to go to barber shop to make an appointment. Through website to make an appointment can help users time management, avoid time conflicts and can make an appointment anywhere.

--Creativity

Users can make an appointment anywhere, anytime. Because there are special time, people should try to stay at home, reduce the number of trips.

Intended behaviour

--User Story

- 1. As a user, I want a haircut and I'm not sure if the haircut time conflict with my schedule, I can through the website to make an appointment and prevent time conflict. Users can see the timetable in booking page and to check the time.
- 2. As a user, I'm a regular customer of this barber shop and I know which

barber is the best, when I making an appointment, I can choose the barber who I want.

- 3. As a user, I want to go to the barber shop near me, before you start make a appointment, you can choose a barber shop, and check which one is close-in.
- 4. As a user, I want to make a appointment, but I don't want to register my information every time, so the user can create a account, this can save a lot of time for users.
- 5. User process website to appointment, they will need not have communicate with receptionist.
- 6. As a mobile user, I can process this website to make a appointment at any time. So our website should be a responsive, there is another stylling made for a small screen,

--Complex Components

The users can choose the barber to decide the fee and time spent, when they click the click the button, it will show behind button.

Users can choose the time, it is when they can go to barber shop.

After login, users can choose the shop, each shop have different location and barber.
